Printing techniques | Werbeanbringungstechniken

T Tampo print – Popular printing technique used mainly for small objects eg. ball pens, lighters, keyrings, business card holders, made of plastic, metal, rubber, paper, glass, wood.

Tampondruck – Sehr populäre Variante der Werbeanbringung, die meist auf kleinen Artikeln jeder Art verwendet wird. Das Druckmotiv wird mit Hilfe eines Silikontampons auf den Artikel aufgetragen.

S Screen print – Imprint method used on large and flat area. This method is an alternative to tampo print and it is used mainly to customize textiles and also items made of plastic, metal, glass and wood.

Siebdruck – Diese Methode der Werbeanbringung wird auf größeren und flachen Oberflächen angewendet. Siebdruck wird vor allem bei Textilartikeln sowie Plastik, Metall, Glas und Holz gebraucht.

L Laser engraving – It is a durable and very precise decorating method applied usually on wood, metal, leather and glass. The colour of the logo or inscription depends on material of the engraved product.

Lasergravur – Der Vorteil der Lasergravur liegt in der sehr guten Haltbarkeit auf Artikeln aller Art. Durch einen Laser wird das Logomotiv in die Oberfläche eines Artikels eingebrannt. Die Farbe der Gravur hängt vom Produktmaterial ab.

TF Heat transfer – Imprint technique applied mainly on textiles, which depends on transferring a special foil with logo or inscription onto the customized surface. Applying this method results in high quality personalization, influences the process speed and enables realization short series.

Thermotransfer – Thermotransfer ist ein Druckverfahren, bei dem das Druckbild zuerst spiegelverkehrt auf eine Transferfolie gedruckt und dann mittelseiner Transferpresse auf den Artikel übertragen wird. Durch einen Transferdruck lassen sich vor allem mehrfarbige und detailgenaue Drucke realisieren, z.B. auf Regenschirmen, Textilien oder Taschen.

H Embroidery – Modern and effective customization technique, where designs are stitched with an automated embroidery machine. Applied to caps, bags, towels, textiles.

Stickerei – Diese moderne Methode dient zur Veredelung von Textilien. Es wird meistens auf Mützen, Taschen, Badetüchern verwendet.

TC Hot stamping – Effective and durable technique applied mainly on leather products and also PU, carton and paper. Stamping involves the use of shaped stamps to create an imprint on a chosen surface.

Heißprägung – Diese Werbeanbringungsmethode empfehlen wir besonders für Werbeartikel aus echtem Leder, Kunstleder, PU, Karton und Papier. Im Gegensatz zum Tampondruck handelt es sich um ein Trockendruckverfahren.

SL Sublimation – Durable customization technique used mainly for branding textiles eg. caps, T-shirts etc. Logo or inscription should be first printed using special sublimation ink and then transferred onto the objects surface with a special press.

Sublimation – Technik der Werbeanbringung, besonders geeignet für Textilien, z.B. Mützen, T-Shirts etc. Das Motiv wird zuerst auf einen speziellen Träger mit Hilfe entsprechender Sublimationstuschen aufgedruckt und demnächst auf die Fläche des Artikels mittels einer Presse übertragen. Die Sublimation findet auf hellen Flächen ihre Verwendung.

D Doming – Durable and very effective decorating technique. A polyurethane layer is applied on the printed label, protecting and magnifying, the imprint underneath. Final product has excellent mechanical, chemical and UV resistance to withstand years of indoor or outdoor use.

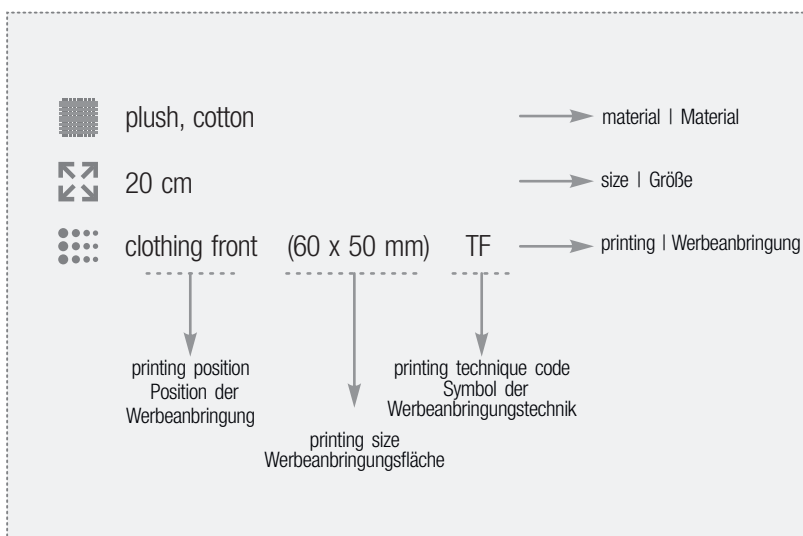

Doming – Doming ist eine Form der Drucktechnik, bei der klares Flüssigharz auf einen gedruckten Aufkleber aufgebracht wird. Durch Doming und 3D-Effekt erhält der Aufkleber ein attraktives Aussehen. Der Druck ist auch wasserfest, UV-resistent und deshalb sehr haltbar.

FC Full color print – Technology which enables printing in full color on various surfaces in high resolution 1440 x 1200 dpi, with UV paints (CMYK + white) ensuring intensive colors and perfect covering.

Full-Color-Druck – Diese Technik der Werbeanbringung ermöglicht einen Full-Color-Aufdruck auf unterschiedlichen Flächen in 1400 x 1200 dpi. Sie setzt UV-Farben (C.M.Y.K. + weiß) ein, die einen haftbarem Aufdruck mit intensiven Farbtönen bieten.
